Darrel,

Below is the information you requested by phone and e-mail on June 22, 2010, for VA New York Harbor Healthcare System, Brooklyn, New York for NMED.

**How many seeds were implanted into the patient?**

60 seeds were implanted into patient on 9/18/2008 during the initial procedure.

2 seeds were recovered from perineum on 9/19/2008.

An additional 10 seeds were implanted into patient on 10/30/2008 during a touch-up procedure.

**What was the dose prescribed and dose given to the patient?**

Prescribed dose was 144 Gy for treatment on 9/18/2008.

D90 to prostate was 69% of prescribed dose for treatment on 9/18/2008.

A touch-up implant was performed on 10/30/2008 and resulted in a final D90 of 90% of initial prescribed dose for both treatments combined.

**What was the activity of each seed?**

Activity was 0.435 mCi per seed for the initial implant on 9/18/2008.

Activity was 0.457 mCi per seed for the touch-up implant on 10/30/2008.

**What was the model number of the seeds?**

Model number was STM 1251 for seeds used on both implant dates.

**Who was the manufacturer of the seeds?**

Seed manufacturer was Bard for seeds used on both implant dates.

If you have any questions, please contact me.

Thanks,  
Tom
