76 FR 5410

Dear Nuclear Regulatory Commission,

(51)

I and my family are urging you to stop the relicensing of south Texas project reactors 1 & 2. Safety reasons are our main concern. With age the risk of accident, fire, or explosion increases. In addition nuclear reactors use large quantities of water, water that could be used for drinking, livestock and farming. There is no solution for the disposal of radioactive waste, so it makes no sense to continue generating more.

Thank you for your time & consideration

Sincerely

The Aguilar Family
