Dear Nuclear Regulatory Commission,

76FR 5710

I and my family are urging you to stop the re-licensing of south Texas project reactors 1 and 2. Safety reasons are the most concerning. The risk of an accident, fire, or explosion increases with the age of the reactors. There are safer, cleaner alternative ways to generate the same power that produce less harmful wastes. Nuclear power should be as clean as possible, but we cannot achieve this with by using outdated reactors.

(52)

Thank you for your time and consideration,

Sincerely,

The Aguilar family

Juan Aguilar
