Re: South Texas Project Units 1 & 2 Relicensing, NRC-2010-0375
DOCKET NOS. 50-498; 50-499

To Whom It May Concern:

-The re-licensing of these two reactors for an additional twenty years should be halted for safety reasons.

-The risks of an accident, fires, or explosions at one or more reactors at the site could increase with aging reactors.

-These reactors consume vast quantities of water use, largely from the Colorado River, water that is needed for drinking water, livestock and farming.

-There is no adequate solution for radioactive waste, so it makes no sense to continue generating more.

Sincerely,

Kelly Simon
