Sequoyah Nuclear Plant, Unit 2
Facility Operating License No. DPR-79
NRC Docket No. 50-328

Subject: **Submittal Schedule for Licensing Amendment Requests
Supporting the Sequoyah Nuclear Plant, Unit 2, Steam Generator
Replacement Project**

The purpose of this letter is to notify the NRC of a change in the submittal schedule for License Amendment Requests (LARs) supporting the Sequoyah Nuclear Plant (SQN), Unit 2, Steam Generator Replacement Project. The Tennessee Valley Authority (TVA) plans to replace the SQN, Unit 2, steam generators in the Cycle 18 Refueling Outage, scheduled to start in the fall 2012.

During a January 26, 2011 pre-submittal meeting with the NRC, TVA presented a schedule to submit four LARs supporting the SQN, Unit 2, Steam Generator Replacement Project by May 1, 2011. The LAR requesting to use Bar-Lock mechanical couplers has been submitted. The three remaining LARs, the request to address the Code change used in restoration of the concrete roof, the request for a one-time use of two 18-inch hatches in the shield building roof, and the request to revise steam generator inspections, will be submitted by June 1, 2011.

A fifth LAR, the request for a one-time use for movement of loads, originally scheduled to be submitted by July 1, 2011, will be submitted by July 22, 2011. The revised submittal schedule for these LARs supports a one year NRC review time prior to the requested approval date.
