

Beaver Valley Assessment Meeting

Beaver Valley Safety Performance in 2010 & U.S. Nuclear Plant Safety in light of Japan Events

**2010 Reactor Oversight Process
Nuclear Regulatory Commission – Region I**

1

Protecting People and the Environment

Today's NRC Representatives

- **Darrell Roberts** – Director for Division of Reactor Projects (DRP)
- **Ron Bellamy** – DRP Branch Chief
- **David Werkheiser** – Senior Resident Inspector
- **Erin Bonney** – Resident Inspector
- **Bill Cook** – Senior Reactor Analyst

2

Protecting People and the Environment

Agenda

- Introduction
- Discussion of Beaver Valley safety performance
- Discussion of U.S. nuclear plant safety in light of Japan events
- NRC to address public questions
- Closing remarks

3

Protecting People and the Environment

NRC Assessment Summary

- FENOC operated Beaver Valley safely and in a manner that preserved the public health and safety and protected the environment.
- Beaver Valley was in the Licensee Response column of the Action Matrix during the period
- Two team and two temporary instruction inspections are planned for 2011

4

Protecting People and the Environment

Inspection Activities in 2010

- 4600 hours of inspection and related activities
- There are two resident inspectors on site – residents perform inspections daily and can respond to plant events at any time
- 14 regional inspections
- Five team inspections
 - Emergency Prep.
 - Heat Sink & Mods
 - Security & FOF

5

Protecting People and the Environment

Performance Indicator and Inspection Results

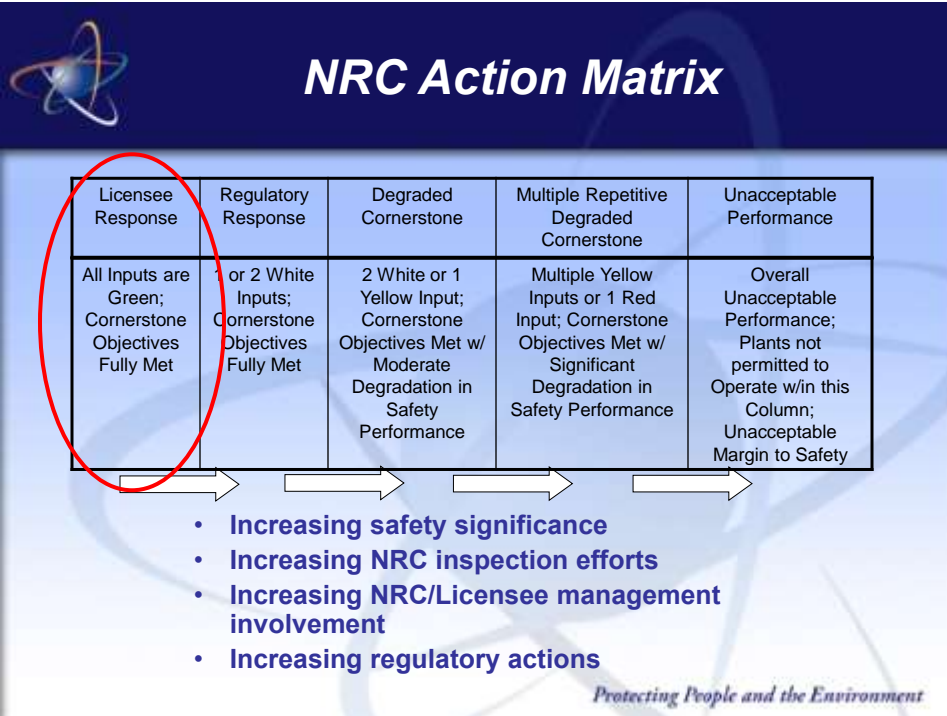

January 1 through December 31, 2010

- All Green Performance Indicators
- Four Green non-cited violations/findings
- No Greater than Green inspection findings

6

Protecting People and the Environment

NRC Action Matrix

Licensee Response	Regulatory Response	Degraded Cornerstone	Multiple Repetitive Degraded Cornerstone	Unacceptable Performance
All Inputs are Green; Cornerstone Objectives Fully Met	1 or 2 White Inputs; Cornerstone Objectives Fully Met	2 White or 1 Yellow Input; Cornerstone Objectives Met w/ Moderate Degradation in Safety Performance	Multiple Yellow Inputs or 1 Red Input; Cornerstone Objectives Met w/ Significant Degradation in Safety Performance	Overall Unacceptable Performance; Plants not permitted to Operate w/in this Column; Unacceptable Margin to Safety

• Increasing safety significance
 • Increasing NRC inspection efforts
 • Increasing NRC/Licensee management involvement
 • Increasing regulatory actions

Protecting People and the Environment

2010 Beaver Valley Assessment Summary

- Beaver Valley was operated safely during the period
- Licensee Response column of the Action Matrix
- Baseline inspections are planned for 2011

8

Protecting People and the Environment

Beaver Valley Assessment Meeting

U.S. Nuclear Plant Safety in Light of Japan Events

9

Protecting People and the Environment

U.S. Nuclear Plants Remain Safe

- **NRC requires plants to be designed to withstand external events**
- **NRC requires a defense-in-depth approach to safety**
- **NRC performs independent safety inspections**
- **NRC assesses new safety information and requires improvements**

10

Protecting People and the Environment

Designed for Site Specific Natural Events

- Earthquakes
- Tsunamis
- Hurricanes
- Floods
- Tornadoes

11

Protecting People and the Environment

The NRC Requires Defense-In-Depth

- Redundant and diverse safety systems
- Multiple physical barriers to contain radioactive material
- Testing and inspection of systems important to safety
- Emergency planning

12

Protecting People and the Environment

NRC Independent Safety Inspections

Reactor Oversight Program

- NRC inspectors have unfettered access to all plant activities related to nuclear safety and security
- At least two full-time NRC resident inspectors at each nuclear plant
- NRC specialists conduct additional inspections at each nuclear plant

13

Protecting People and the Environment

NRC Requires Safety Improvements

NRC assesses new safety information, develops lessons learned, and requires safety enhancements:

- NRC operating experience program
- Rulemaking (Station Blackout)
- Post TMI Actions
- Post 9/11 Orders
- Generic Safety Issues

14

Protecting People and the Environment

NRC Response to Events in Japan

- NRC conducting a methodical and systematic review
- Near-term actions (<90 days)
 - conducting additional inspections
 - identifying near term operational issues
- Longer-term actions

15

Protecting People and the Environment

Director's Comments

**Darrell Roberts, Director
Division of Reactor
Projects
USNRC, Region I**

16

Protecting People and the Environment

Meeting Ground Rules

- 1. Please be respectful to the speaker – only one speaker at a time**
- 2. See NRC staff if you have procedural questions/concerns or still want to sign up.**
- 3. NRC staff members will be available after the meeting to talk to those interested**

17
