Oyster Creek Nuclear Generating Station
Renewed Facility Operating License No. DPR-16
NRC Docket No. 50-219

Subject: Supplement to Technical Specification Change Request No. 340
Proposed Revision to Appendix B, Environmental Technical Specifications
of the Facility Operating License

Reference: (1) Letter from Pamela B. Cowan to the USNRC Document Control Desk,
"Technical Specification Change Request No. 340, Proposed Revision to
Appendix B, Environmental Technical Specifications of the Facility
Operating License," dated June 11, 2010

On June 11, 2010, in accordance with the provisions of 10 CFR 50.90, Exelon Generation Company, LLC (Exelon) submitted a request for an amendment to the Oyster Creek Nuclear Generating Station (OCNGS) Technical Specifications (TS), Appendix B, of the Renewed Facility Operating License No. DPR-16 (Reference 1). The proposed changes would revise administrative requirements for the Responsibility and Review and Audit sections in Appendix B, Environmental Technical Specifications.

The Reference (1) License Amendment Request (LAR) contained as part of the evaluation section, a sentence stating that TS Appendix B, Section 3.3 is being revised in part to remove the reference to AmerGen. In actuality, the reference to AmerGen had been previously corrected as part of OCNGS Amendment No. 271 (Issuance of Conforming Amendments). Note that this correction has no impact on the final text proposed by the LAR in that Section 3.3 is being revised to remove any specific reference to the licensee (either AmerGen or Exelon).

There is no adverse impact to the previously submitted No Significant Hazards Consideration Determination. There are no regulatory commitments contained within this letter.

Supplement to TSCR No. 340
Proposed Revision to Appendix B, Environmental Technical Specifications
Docket No. 50-219
