Subject RE: Quick Question Concerning EN45294 and 45295

History:

 This message has been replied to.

Yes, there were two separate events at Allegiance Health. Both were underdoses, one at approximately 76 %, and one at approximately 47%.

Subject: Quick Question Concerning EN45294 and 45295

Tamara,

I just have a quick question concerning EN45294 and 45295 (NMED Item 090691 and 090692). I just need to make sure that these were two separate incidents. They both happened at the same facility (Allegiance Health) on the same date (8/24/2009) and were reported on the same date (8/25/2009). They seed implant procedures involved different numbers of seeds with different activities. They seem to be different incidents, but I just need to double check. Thanks for your help and have a great day,

Dante Huntsman
