Thank you for the information Sam. I will get it into the NMED record shortly. Have a great Friday,

Dante

Subject RE: NMED # 100031--QHG of Indiana, Fort Wayne, IN

Dante,

The following corrective action is submitted per your request for the subject NMED Item: (1) assign one technologist the responsibility for all patient treatment parameters prior to the administration by the authorized user; (2) develop and implement a "time-out", dual verification protocol involving the authorized user and the technologist to verify and ensure that all appropriate patient/dose parameters are in agreement with the written directive prior to administration: and (3) inform the staff of the new requirements.

Hope this helps.

Sam Mulay

Hello Darrel, thanks for the information. I will get that NMED record listed as closed shortly. By the way, what were those adequate corrective actions. If I know I can also list the NMED record as complete,

Dante

Darrel,

The subject NMED item was reviewed on January 20, 2010 and the final report was issued on February 19, 2010, as an NCV. The licensee's corrective actions were reviewed during the inspection and were determined to be adequate. Therefore, this NMED Item may be considered closed. Let me know if you need anything else.

Sam
