C A R E E R P A T H

URS Nuclear, LLC
Construction ES&H/Security Manager

Eagle Rock Enrichment Facility, Idaho Falls, ID
Feb. 2011 to Present

Major Functions: Develop key environmental, safety and security plans for the construction of a 3.5 billion dollar uranium enrichment facility. Plans included OSHA construction safety and health policies and programs for an expected 2000+ person workforce, environmental compliance programs such as storm water pollution prevention, SPCC, waste management and fugitive dust control plans. Research the plan for a robust security system that included processes such as; background checks, substance abuse testing, clearances, bio-metrics, electronic access controls and video surveillance. Work with the owner's various levels of management developing policy and implementing programs to reduce risk, control cost and loss of assets and resources.

CH2M-WG Idaho, LLC
Director, Industrial Safety & Health

Idaho National Laboratory
November 2006 to Feb. 2011

Major Functions: Manage professional and technical staff of 56 members in fulfillment of Industrial Hygiene, Occupational Safety and Fire Protection programs for the decommissioning and demolition of major nuclear facilities at the Idaho Closure Project. Review, inspect and coordinate work activities that require health and safety hazard analysis evaluations and implement Integrated Safety Management programs. Prepare health and safety plans, procedures and process activities and ensure compliance with such programs as - Price Anderson Amendments Act, 10 CFR 851 DOE Worker Safety and Health Programs and Accident Reporting. Built the processes of a pro-active H&S program that stresses supervisory responsibilities/accountability, human performance, and employee involvement.

BATTELLE ENERGY ALLIANCE LLC/
BECHTEL BWXT IDAHO LLC
ESH&QA Manager

Idaho National Laboratory
May 2000 to Nov. 2006

Major Functions: Manage safety, industrial hygiene, fire protection, quality assurance, environmental, radiological protection, and emergency preparedness activities at the Specific Manufacturing Capabilities operations within the Idaho National Laboratory. At the VPP STAR Facility, responsibilities include the development and implementation of ESH&QA programs with a budget of \$4.5 million. The work for others program manufactures armor for the Army's main combat battle tank. Interface with various customers includes line management, DOE-ID and HQ personnel, DOD-Army Programs Office and the INL home organization representatives. Identify and develop improvement plans for program execution, provide project management and over site of these initiatives. Manage a professional staff of 30 employees, in order to maintain an outstanding accident/injury prevention and quality assurance program. The results include, over 5 years without a DART case and even a 12 month period without a recordable case. The SMC project has one of the lowest incident injury rates for the entire DOE Complex.
