OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Dear Secretary Vietti-Cook,

I can not understand why a nuclear power plant would be given any consideration until a solution to the waste products are created. It is clear that each time we build one, we permanently destroy part of our land, simply for the profit of a few people. This is immoral and in my opinion, criminally negligent. The risk is now clear, nuclear power plants will fail and there is nothing to prevent release of radiation. Slowly poisoning our planet bodes ill for the future of our children. Because there are alternatives, it only makes sense to stop and solve the problems rather than cave to money.
