Subject UPDATE ON NMED NO 070672 Karmanos Cancer Center

Dante: This is an update on the event reported by Karmanos Cancer Center (No. ~~070122~~). An NRC consultant has been hired to review this case (Dr. Goans). An inspection was done on October 29 through November 6, 2007. The event looks like an Abnormal Occurrence. The patient received 1,800 rads to the wrong side of the brain. The tumor was on the right side and they treated the left side. The Gamma knife is a [REDACTED] with 6,161 curies of cobalt-60 on May 1, 2002 (you can do the decay if you want)

Corrective actions will be spelled out in our inspection report when we issue it.
