Subject Closure Information for NMED 080278

I have questioned the inspector who reviewed available data on the medical procedures and she has determined that it would take significant effort to obtain the information concerning the sealed sources manufacturer's names and model numbers. The licensee has a number of different source strengths and the sealed sources are made by a number of different manufacturers. Hence, management would like the NMED event closed without requiring that the information on the sealed sources be provided.

Thank you for your efforts and, when possible, we will provide the information requested.
