Subject: Exempt Distribution License Application and Question

Hello Bruce,

I have recently submitted an application for our client to obtain an exempt distribution license for Kr-85 containing light bulbs. In addition our client is in the process of obtaining a Possession Incident to Exempt Distribution license from the state of New Hampshire in order to obtain product for exempt distribution. Our client will be taking over the distribution of these light bulbs from Phillips as they are focusing on other products. As part of this deal they will take possession of all remaining inventory from Phillips as part of the deal. We have a few questions regarding the distribution of the existing inventory. Is there a time that is best for you to discuss a few of the questions we have over the phone?

Thank You,
Nasser Rashidifard
