USA

To Whom It May Concern,

Reference licence numbers 24-32675-01 and 24-32675-02E

Our company, Ostro Minerals UK Ltd and its associated companies have been in the business of irradiating Gemstones for 3 decades. Some years ago the NRC issued licenses to Ideal Source Quality Assurance, in Columbia Missouri, for materials possession and exempt release of irradiated blue topaz. Its establishment was funded by Ostro Minerals and it works exclusively to test materials produced by Ostro. The shares of this company have been held by Professor William Yelon who is the Radiation Safety Officer (and sole employee) of ISQA. It is our intention to acquire the shares in ISQA and we would be grateful if you could advise if this is acceptable. There will be no change in the role filled by Professor Yelon with regard to testing and compliance with NRC regulations.

Please feel free to e-mail your response to maurice@ostro.com or post it to the address on the letter head.

Yours faithfully,

Maurice Ostro
Chairman

Karen,

I received the attached amendment request by email. Please send to the IM center for initial processing into ADAMS.

Thanks

Ken Lambert
Acting Chief, Materials Licensing Branch
Division of Nuclear Materials Safety

Ken,

Please see the inquiry below. Has this been received by Region III? Thanks,

Nima

Subject: ISQA Share Aquisition

Dear Mr Ashkeboussi and Ms Dimmick,

I understand that you met with our Chairman Maurice Ostro in Washington in October 2010. Maurice has asked me to contact you to see if you might be able to assist us?

We sent the attached letter to the NRC Region 3 Office in Lisle Illinois on 15th March and to date we have not received a response. I wonder have we sent it to the incorrect department and if so would you have any idea whom we can redirect our query too?

We would be very grateful for any assistance you may be able to provide in redirecting us to the appropriate persons.

Many thanks and kindest regards,

Fiona Little
