Re: Control # 574341

Dear Shawn:

Per our phone conversation on 5/10/11, Q/C Resource Technical Services will dispose of unwanted portable sealed source devices through one of the gauge manufacturers.

This service is provided for the customers with a letter of disposal for their records provided by the company which accepts the gauge(s). There is no "waste" generated by use of sealed source devices.

Sincerely,

Philip C. Palilla
Q/C Resource Technical Services
