Revision to License Renewal Guidance

Treated Borated Water (SER Sections 3.2.2.1.X and 3.3.2.1.Y)

- The staff is developing interim staff guidance to update the GAIL Report on aging management of treated borated water.
- Boron is no longer credited as being a corrosion inhibitor, and one-time inspections are recommended to verify the effectiveness of the Water Chemistry Program to manage loss of material and cracking in treated borated water that is not deoxygenated.
- Affected systems at Salem include the spent fuel pool systems, containment spray system, portions of the ECCS, and others.
- The applicant submitted a draft LRA supplement that
 - Adds the One-Time Inspection Program to verify the effectiveness of the Water Chemistry Program to over 110 line items
 - Updated the description of the One-Time Inspection Program and the Water Chemistry Program and one commitment in the UFSAR supplement
- The staff finds this acceptable and will update the SER
