Subject: FW: Loose Part Monitoring Information

Assuming we have additional time on Thursday to go over other I&C items than WINCISE, please see the following comment

Justin C. Poole
Project Manager
NRR/DORL/LPWB
U.S. Nuclear Regulatory Commission
(301)415-2048
email: Justin.Poole@nrc.gov

Justin:

What is now needed is

- “the results of the vibration EQ testing (don’t have this), and
- something in writing on the docket stating that the EQ results have been analyzed and the LPMS in-containment equipment EQ tests satisfies its EQ specification (don’t have this).
- Also, if the vibration EQ specification claims there is “no specification for vibration testing,” such as in the case of the 120 ft. Softline Cable Assembly and the Charge Preamplifier, then I would like to have a documented reason why (perhaps attachments 6-1 and 6-2 of WCAP 8587 provides that??).
