RECEIVED  
MAY 5 2011  
DNMS

To Whom it May Concern:

(This is a letter of notification) As of May 10, 2011, Dr Jason Brown will be an authorized user of by-products material at our facility. Enclosed is a copy of his Board Certification and a copy of the NRC License from Riverton, Wyoming, in which he was specifically listed. If you have any questions or concerns please call me at 307-864-5047.

Thank you for your attention to this matter.

Respectfully,

  
Daryl T. Mathern  
Nuclear Medicine Manager

Amendment No. 28

12. Licensed material is only authorized for use by, or under the supervision of:
- Individuals permitted to work as an authorized user in accordance with 10 CFR 35.13 and 35.14.
  - The following individuals are authorized users for the material and medical uses indicated:
 

<u>Authorized Users</u>	<u>Material and Use</u>
James R. Taylor, M.D.	35.100; 35.200; 35.300; 31.11
Jason E. Brown, M.D.	35.100; 35.200; oral administration of sodium iodide I-131; 31.11
13. For sealed sources not associated with 10 CFR Part 35 use, the following conditions apply:
- Sealed sources shall be tested for leakage and/or contamination at intervals not to exceed the intervals specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or under equivalent regulations of an Agreement State.
  - Notwithstanding Paragraph A of this Condition, sealed sources designed to primarily emit alpha particles shall be tested for leakage and/or contamination at intervals not to exceed 3 months.
  - In the absence of a certificate from a transferor indicating that a leak test has been made within the intervals specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or under equivalent regulations of an Agreement State, prior to the transfer, a sealed source received from another person shall not be put into use until tested and the test results received.
  - Sealed sources need not be tested if they contain only hydrogen-3; or they contain only a radioactive gas; or the half-life of the isotope is 90 days or less; or they contain not more than 100 microcuries of beta- and/or gamma-emitting material or not more than 10 microcuries of alpha-emitting material.
  - Sealed sources need not be tested if they are in storage and are not being used; however, when they are removed from storage for use or transferred to another person and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.
  - The leak test shall be capable of detecting the presence of 0.005 microcuries (185 becquerels) of radioactive material on the test sample. If the test reveals the presence of 0.005 microcuries (185 becquerels) or more of removable contamination, a report shall be filed with the U.S. Nuclear Regulatory Commission in accordance with 10 CFR 30.50(c)(2), and the source shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations. The report shall be filed within 5 days of the date the leak test result is known with the U.S. Nuclear Regulatory Commission, Region IV, 612 East Lamar Blvd., Suite 400, Arlington, Texas 76011-4125, ATTN: Director, Division of Nuclear Materials Safety. The report shall specify the source involved, the test results, and corrective action taken.
