Name of Licensee: Triton Construction, Inc.
Name of Participant(s): William (Mark) Gessel & Sattar Lodhi
Telephone No. 304 755 1401
Subject: Leak Test Authorization

The application included that the licensee will follow leak test procedures of NUREG 1556, Vol. 1. This appeared to be unusual because gauge users normally do not have equipment to analyze the leak test samples. I called the applicant to confirm if they intended to analyze the leak test samples. The applicant stated that they are not requesting authorization to analyze the samples, just collection of leak test samples and that they will send the samples to another service provider.

I requested the applicant to send a letter confirming this. He will send the letter soon.

I provided him with LAT's fax number and the control number.
