Scott/Tom:

The NRC staff has reviewed your license amendment application dated December 10, 2010 for the Callaway Plant - Union Electric Company's request to add new Surveillance Requirement 3.3.8.6 to Technical Specification 3.3.8, "Emergency Exhaust System Actuation Instrumentation." Based on that review and as mentioned in our phone discussion on May 19, 2011, the NRC staff has identified a need for additional information as outlined in the attached request for additional information (RAI).

The staff requests a response by June 17, 2011.

Thank you for your attention in this matter,
Jim
