Subject: RE: Telecon Summary--Conference call with Vogtle, May 19, 2011

On May 19, 2011, NRC staff (Rafael Rodriguez, Jerry Wilson, Fred Schofer and Ravindra Joshi) participated in a telephone conference call with Vogtle representatives(list is provided below) to discuss issues surrounding Part 40 and 70 license requests. The applicant confirmed that it was not seeking a site-specific Part 40 license during the period from COL issuance to the Commission 52.103(g) finding (refer to the applicant's letter dated March 16, 2011, ML110800088). However, the site-specific Part 40 license is required (depleted uranium). In addition, the applicant was asked whether it intends to use any Part 70 material other than the fuel. The applicant indicated that the fission chambers (detectors) will be used and stated that the information such as physical form and quantity is currently not included in the AP1000 DCD or VEGP FSAR. The applicant indicated that it will provide that info including info required by 10 CFR 70.22(a) (6) through (8) in a future submittal.

Vogtle Representatives:

- Wes Sparkman, SNC
- William Smith, consultant for SNC
- Jerry Sims, consultant for SNC
- Mike Yox, NuStart
- Joe Gillespie, SCANA
- Dave Waters, Progress
- Larry Taylor, Progress
- George Madden, FPL
- Neil Haggerty—Nustart
