Docket No(s).

030-35721

Name of Licensee: McElroy Coal Company**Name of Participant(s):** Joseph Richards & Sattar Lodhi**Telephone No.** 724 485 4596**Subject:** Inclusion of GL devices to the Specific license

During my review of the renewal application, I noticed that the latest inspection (4/20/2011 & 5/10/2011) record indicated that the licensee possessed 12 gauges, but did not specify how many of these were specifically licensed. I requested Mike Reichard to look into the GLTS records to determine the count of GL devices. Mike noted that they have "around" 10 GL devices. In order to clear the confusion, I requested the licensee to provide me with the list of all licensed devices in their inventory. He stated that they have 11 GL devices and 2 specifically licensed devices.

I also discussed with the licensee the option to include all GL devices in their specific license. The licensee wanted to know of any additional requirements that they will need to follow if they decide to include the GL devices in their specific license. I explained to him that the regulatory requirements for these devices will be the same as the two devices that they currently possess under their specific license. I also reminded him of the requirement to notify GLTS and the vendor about the transfer of GL devices to their specific license.

He stated that they have decided to include the GL devices in their specific license and he will send a request that can be incorporated in the renewal process.
