RE: License Number 13-04004-02; Docket Number 030-14763

To Whom It May Concern:

This is a formal notification that Taylor University, Upland, IN has ceased all activity involving regulated radioactive materials and has disposed of all regulated radioactive materials through the services of Bionomics, Inc. They removed the bulk of our radioactive materials on November 4, 2010 and the remaining materials on May 6, 2011.

I have enclosed completed NRC Form 314 and the results of two radiation surveys. One of these surveys was conducted by Bionomics and the second by us.

We will continue to use some exempt quantities of radioactive materials for Nuclear Physics and Nuclear Chemistry labs. But we do not intend to use any materials that would require a license so we wish to terminate our license.

Please feel free to contact me with any questions concerning this issue.

Sincerely,

**Radiation Survey**  
Taylor University  
May 19, 2011

All of the regulated radioactive materials at Taylor University were kept in a small closet behind four locked doors in an area that was rarely used by anyone. There is a lead box (approximately 18" x 18" x 10") within the closet that contained all of the radioactive materials. All of these materials were removed by Bionomics, Inc. on November 4, 2010 and May 6, 2011.

After the final removal, the Bionomics technician surveyed the lead box, closet and outer room where materials were prepared for transport. Both a Geiger counter and a multichannel radiation spectrum analyzer were used in the survey. No radiation above background was found.

On May 19, 2010, DG Hammond, Taylor University RSO, confirmed this by using a calibrated Geiger counter. There was no radiation above background within the lead box, the storage closet, or the outer room where the materials were prepared for shipment.
