Richard N. Joyrich, M.D.
Radiation Safety Officer
VHS Harper – Hutzell Hospital, Inc.
3990 John R Street
Detroit, MI 48201

Dear Dr. Joyrich:

Enclosed is Amendment No. 99 to your NRC Material License No. 21-04127-02 in accordance with your request. Please note that the changes made to your license are printed in **bold font**.

Please note that, at this time, we must limit your possession of iodine-131 in Subitem No. 8.C under your authorization for materials in 10 CFR 35.300. Your possession limit must be specific, in units of curies or millicuries and include waste streams also. It must be less than ten curies (not ten curies), realistic for your needs and may allow room for growth.

Please provide a written, signed and dated amendment request containing your possession limit for iodine-131 within 20 days of the date of this letter. Please address your response to my attention at the address above and reference it as "additional information to control number 574536" to ensure proper processing in our office.

If you have any questions, please contact me at (630) 829-9841 and my fax number is (630) 515-1078.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions

R. Joyrich

regarding protection of security related sensitive information may be located at:
<http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

Colleen Carol Casey
Materials Licensing Branch
