Subject: Shallow Monitor Well Excursion at CBO

Ron,

I wanted to follow-up on the voicemail I left for you. A confirming sample today from shallow monitor well SM6-20 exceeded the single control limits for conductivity and chloride. This well has gone on excursion the past couple of years when spring-time precipitation has caused a rise in the water level. We suspect this is the case again as we received 3-4 inches of rain last week and an additional 3/4 inch last night. A written report will follow.

Have a nice day,

Walt Nelson
