Idaho Falls, ID 83415

SUBJECT: RESPONSE TOTHREE MILE ISLAND UNIT-2 ISFSI - NRC INSPECTION
REPORT 072-020/2011-001 NOTICE OF DEVIATION

Dear Mr. Provencher:

On April 7, 2011, the NRC issued Inspection Report 072-020/2011-001 (ML11097A028) which included a Notice of Deviation concerning the removal of a requirement from your TMI-2 Independent Spent Fuel Storage Installation (ISFSI) emergency plan. This requirement concerned the periodic review of your emergency medical services written agreements.

The NRC has reviewed your response, dated May 2, 2011 (ML11143A019), and finds your immediate action to return the commitment to Section 3.7 of the emergency plan and add a notation that this was a commitment made to the NRC as an acceptable corrective action.

Concerning your corrective steps that will be taken to avoid further deviations, you state "The long term corrective action to prevent reoccurrence is to review and revise, **as appropriate**, the administrative procedures addressing licensing basis document change control and commitment management." We do not find your response sufficiently descriptive to understand the changes that will be made to avoid further deviations. As such, we request that once you have determined the appropriate changes and have completed the incorporation of those changes into your program, that you provide a written response to the NRC describing those changes.

Should you have any questions concerning the information discussed in this letter, please contact Mr. Vincent Everett at 817-860-8198 or Mr. Lee Brookhart at 817-276-6549.

Sincerely,

/RA/

Vivian Campbell, Deputy Director
Division of Nuclear Materials Safety
