Dr. Mohapatra,

As we discussed during a telephone conversation today, May 26, 2011, the request to amend your license to delete rooms no longer used and to add rooms to be used in the future is not necessary. You may authorize these requests through your broad scope Radiation Safety Committee in accordance with procedures described in your NRC application. Therefore, we have voided this request. If you have any questions, please call me.

Thank you for your cooperation,

Penny Lanzisera
Senior HP, NRC Region 1
