

As part of its pre-application activities pertaining to the anticipated design certification application (DCA) from NuScale Power Incorporated (NuScale), members of the NRC staff and their contractors performed an audit of the NuScale probabilistic risk assessment (PRA) being developed in support of an expected DCA. The review was conducted at NuScale headquarters in Corvallis Oregon, on March 1- 3, 2011.

See attachment (ML111470312).
