SUBJECT: SUMMARY OF MAY 19, 2011, CATEGORY III PUBLIC MEETING
REGARDING PART 76 CERTIFICATE TERMINATION OF THE
PORTSMOUTH GASEOUS DIFFUSION PLANT

On March 19, 2011, the U.S. Nuclear Regulatory Commission's (NRC's) staff from the Office of Nuclear Material Safety and Safeguards in Rockville, MD and the Region II Office in Atlanta, GA held a Category 3 public meeting in Piketon, OH (Agencywide Documents Access and Management System's [ADAMS] Accession Number ML111101679). The purpose of the meeting was to provide an opportunity to provide information to the public regarding the decertification process along with an opportunity for the public to ask questions to the NRC.

The NRC staff made a presentation (ML111380009) providing a brief description of the applicable statutes and regulations, along with an overview of the Certificate termination process. During the meeting, the United States Enrichment Corporation (USEC) and the U.S. Department of Energy (DOE) also provided presentations (ML111430607; ML111430600) regarding their roles and responsibilities during the termination of operations and transfer of regulatory authority. A copy of the Draft Certificate Termination Checklist (ML111040093) was distributed at the meeting to ensure openness and transparency in NRC process development.

The meeting was useful in communicating with the public and external stakeholders regarding potential future actions with Part 76 Certificate holders. The NRC staff plans to consider the public's comments and questions from the meeting prior to its issuance of a Final Certificate Termination Checklist. The Final Certificate Termination Checklist and any other documents related to this action will be publicly available in ADAMS and docketed under docket number 70-7002.
