Subject: Acceptance review comments on Ludeman Application

Good morning Jon. Per your request, the attached file contains the NRC staffs initial comments on the previously withdrawn application for the Ludeman facility. These comments were generated by the staff during the acceptance review, and therefore, are not and were not intended to be comprehensive detailed technical comments. These comments generally do not reflect on the technical adequacy of the application. Instead, these comments identify potential information gaps in the application.

Per our previous conversation, this email and the attached comments will be made publicly available in ADAMS.
