REQUEST FOR ADDITIONAL INFORMATION
REGARDING LICENSE AMENDMENT REQUEST FOR
APPROVAL OF THE CYBER SECURITY PLAN
SEABROOK, UNIT NO. 1
DOCKET NO. 50-443

The requirements of 10 CFR 73.54(a) are that each licensee subject to the requirements of this section shall provide high assurance that digital computer and communication systems and networks are adequately protected against cyber attacks, up to and including the design basis threat as described in Section 73.1. Furthermore, 10 CFR 73.54(a)(1) states that the licensee shall protect digital computer and communication systems and networks associated with: (i) safety-related and important-to-safety functions; (ii) security functions; (iii) emergency preparedness functions, including offsite communications; and (iv) support systems and equipment that, if compromised, would adversely impact safety, security, or emergency preparedness functions.

Section 3.0 of Enclosure 1 to the cyber security plan, Evaluation of Proposed Change, includes clarifications to the Nuclear Energy Institute 08-09 Cyber Security Plan template with regard to Emergency Preparedness and states, "Therefore, the systems and portions of systems to be protected from cyber attack in accordance with 10 CFR 73.54(a)(1)(iii), must: (1) Perform a RSPS [Risk Significant Planning Standards]-related EP [emergency preparedness] function, and (2) Be within the licensee's complete custody and control."

The rule clearly states that digital computer and communication systems and networks associated with emergency preparedness functions, including offsite communications, shall be adequately protected against cyber attacks. For systems and networks that are not within the licensee's complete custody and control, the licensee is still required to ensure protection against cyber attacks.

Explain NextEra Energy Seabrook's deviation from the 10 CFR 73.54(a)(1).
