**Subject:** SM6-28 and SM8-28 Excursions

Ron,

As a follow-up to my voice mail, SM6-28 and SM8-28 are being placed on excursion status today. SM 6-28 exceeded the MCL for alkalinity and conductivity. SM8-28 exceeded the SCL for conductivity and the MCL for chloride. I will send a follow-up report for both wells. Both wells were on excursion last spring when they exceeded the same parameters. It again appears that high levels of natural precipitation and the high water levels that result caused these excursions.

Have a nice weekend,

Walt Nelson
