SUBJECT: WILLIAM STATES LEE III NUCLEAR STATION, UNITS 1 AND 2
COMBINED LICENSE APPLICATION – ADVANCED SAFETY
EVALUATION WITHOUT OPEN ITEMS FOR CHAPTER 7
“INSTRUMENTATION AND CONTROLS”

By letter dated December 12, 2007 (ML073510494), Duke Energy Carolinas, LLC. (Duke) submitted an application to the U.S. Nuclear Regulatory Commission (NRC) for a combined license (COL) for William States Lee III Nuclear Station (WLS), Units 1 and 2.

Based on our review of the application, the staff is providing the Advisory Committee on Reactor Safeguards (ACRS) its Advanced Safety Evaluation (ASE), without open items for Chapter 7, “Instrumentation and Controls” (ML110560341). Unless otherwise stated in the ASE, the staff’s review was based on Revision 4 of the application that incorporates by reference AP1000 DCD Revision 19. The ASE is being provided to support a meeting of the subcommittee of the ACRS in May 2012. The ACRS Full Committee meeting will be held after the subcommittee meeting.

For Chapter 7, the staff has reviewed the safety evaluation and found no topics that meet the categories of interest that ACRS members would like to review in detail.

The staff concludes that the ASE does not contain any information exempt from public disclosure. However, the NRC will withhold the ASE from public disclosure for ten business days to allow Duke the opportunity to verify the staff's conclusion that the ASE contains no such exempt information. Therefore, the staff requests that the ACRS withhold the ASE from public disclosure until it has been released publicly in the Agencywide Documents Access and Management System.

The staff will inform the ACRS immediately if Duke requests that any of the information in the ASE be withheld from public disclosure.
