SUBJECT: NRC INQUIRY NO. 03012140/2011-001, WEST VIRGINIA PAVING, INC.

Dear Mr. Boggess:

This letter is in regards to an administrative review by NRC staff into the use of byproduct material including Naturally-Occurring and Accelerator-Produced Radioactive Material (NARM) within the jurisdiction of the NRC. During a telephone discussion on June 1, 2011, between you and Steven Courtemanche of this office, it was determined that you do possess material requiring licensure by the NRC but that you do not possess NARM. We have reviewed the information that you have provided to my staff and it was determined that the material in your possession is authorized under your specific NRC license. It was also determined from the discussion that material is being stored at 2950 Charles Avenue, a permanent location not listed on your license. Examination of the docket file determined that the 2950 Charles Avenue location was requested as a storage location in the renewal application dated May 9, 2001. This issue will be handled in conjunction with your renewal application dated May 10, 2011. Any questions on this matter should be directed to Farrah Gaskins, the license reviewer, at 610-337-5143. No further action, concerning this inquiry, is necessary on your part.

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Medical, Academic, and Industrial Uses of Nuclear Material**; then **Regulations, Guidance, and Communications** under **How We Regulate**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 7:00 a.m. to 6:30 p.m. EST, Monday through Friday (except Federal holidays).

Thank you for your cooperation.

Sincerely,
