**Subject:** Turkey Point EPU - Reactor Systems (SRXB) Requests for Additional Information - Round 1.2 (Part 2)

Tom,

Below is a request for additional information (RAI) regarding the Turkey Point Extended Power Uprate license amendment request. This RAI is categorized as a Round 1, Part 2 question because it is not a follow-up RAI to any previous questions asked from the same branch. On June 1, 2011, the Nuclear Regulatory Commission (NRC) staff and Florida Power & Light Company (FPL) discussed the draft RAI to gain a common understanding of the question. It was concluded that Westinghouse will submit the input deck under its own docket and FPL will respond to this RAI by referencing the Westinghouse submittal. The below RAI reflects the question discussed during the June 1, 2011, call. FPL stated that Westinghouse will provide its submittal to the NRC by June 21, 2011. If you have any questions, feel free to contact me.

SRXB-1.2.1 Provide the RETRAN Input Deck for the Loss of External Electrical Load transient as well as a discussion of input parameters. If available, provide a description of calculations of input values.

**Jason Paige**, Turkey Point Project Manager  
Plant Licensing Branch II-2  
Division of Operating Reactor Licensing  
Office of Nuclear Reactor Regulation  
US Nuclear Regulatory Commission
