Thomas Popik - Foundation for Resilient Societies

DOCKETED
USNRC

Comment On: NRC-2011-0069-0002
Petition for Rulemaking Submitted by Thomas Popik

June 10, 2011 (9:20 am)

Document: NRC-2011-0069-DRAFT-0012
Comment on FR Doc # 2011-11112

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Submitter Information

General Comment

I am concerned about Electromagnetic Pulse (EMP), and will all power systems within the electric grid. I feel that the power industry needs to take the threats of both man-made EMP and solar storms very seriously. I urge the NRC to take the lead. I understand that our nation needs reliable power generated by nuclear plants. When a reasonable safety improvement is proposed, the NRC needs to carefully consider it. Petition PRM-50-96 would require backup safety systems for spent fuel pools at nuclear plants. I support the safety improvements proposed by PRM-50-96. Events in Japan after the March 11 earthquake and tsunami have demonstrated the vulnerability of nuclear power plants to loss of power from the electric grid. A recent report by the Oak Ridge National Laboratory discloses a 1% annual probability of long-term and widespread electric grid failure due to natural disaster from solar flare activity. In addition to supporting the petition above, I urge the NRC to review both the public and classified EMP Commission reports, and follow the recommendations.

Van,

Attached for docketing is a comment from an anonymous individual on PRM-50-96 that I received via the regulations.gov website on 6/9/11.

Thanks,
Carol
