

MATERIALS LICENSE

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 38, 39, 40, and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

Amendment No. 96

9. Authorized use:

- A. and B.**
- (1) Research and development as defined in 10 CFR 30.4; animal studies.
 - (2) For possession, use, and processing incident to the manufacture of radiochemicals and radiopharmaceuticals.
 - (3) For storage prior to distribution of manufactured radiochemicals and radiopharmaceuticals.
 - (4) For packaging and distribution of manufactured radiochemicals and radiopharmaceuticals to persons authorized to receive the licensed material pursuant to the terms and conditions of a specific license issued by the Nuclear Regulatory Commission or an Agreement State.
- C. through BB.** Research and development as defined in 10 CFR 30.4 including animal studies; calibration of instruments.
- F. and G.** Calibration of instruments; interim storage.
- H., R., T., and BB.** In electron capture detector cells which are distributed under a specific license issued by the U.S. Nuclear Regulatory Commission or any Agreement State.

- 10. A.** Licensed material in Items 6.A. through 6.H. may only be used at the licensee's facilities located at One Squibb Drive, New Brunswick, New Jersey.
- B.** Licensed material in Items 6.I. through 6.R. may only be used at the licensee's facilities located at Route 206 and Provincetown Road, Lawrenceville, New Jersey.
- C.** Licensed material in Items 6.S. and 6.T. may only be used at the licensee's facilities located at 311 Pennington-Rocky Hill Road, Pennington, New Jersey.
- D.** Licensed material in Items 6.U. through 6.BB. may only be used at the licensee's facilities located at Three Hamilton Health Place, Hamilton, New Jersey.
- 11. A.** Licensed material shall be used by, or under the supervision of, individuals designated by the licensee's Radiation Safety Committee.
- B.** The Radiation Safety Officer for this license is Michael J. Vala, C. H. P.
- 12.** This license does not authorize commercial distribution of licensed material to persons generally licensed pursuant to 10 CFR 31 or to persons exempt from licensing pursuant to 10 CFR 30.18.

Amendment No. 96

13. The licensee shall not use licensed material in or on human beings.
14. The licensee shall not use licensed material in field applications where activity is released.
15. Experimental animals administered licensed materials or their products shall not be used for human consumption.
16. A. Sealed sources and detector cells containing licensed material shall be tested for leakage and/or contamination at intervals not to exceed six months or at such other intervals as are specified by the certificate of registration referred to in 10 CFR 32.210, not to exceed three years.
- B. Notwithstanding Paragraph A of this Condition, sealed sources designed to emit alpha particles shall be tested for leakage and/or contamination at intervals not to exceed three months.
- C. In the absence of a certificate from a transferor indicating that a leak test has been made within six months prior to the transfer, a sealed source or detector cell received from another person shall not be put into use until tested.
- D. Each sealed source fabricated by the licensee shall be inspected and tested for construction defects, leakage, and contamination prior to any use or transfer as a sealed source.
- E. Sealed sources and detector cells need not be leak tested if:
- (i) they contain only hydrogen-3; or
 - (ii) they contain only a radioactive gas; or
 - (iii) the half-life of the isotope is 30 days or less; or
 - (iv) they contain not more than 100 microcuries of beta and/or gamma emitting material or not more than 10 microcuries of alpha emitting material; or
 - (v) they are not designed to emit alpha particles, are in storage, and are not being used. However, when they are removed from storage for use or transfer to another person, and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source or detector cell shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.

Amendment No. 96

- F. The test shall be capable of detecting the presence of 0.005 microcurie of radioactive material on the test sample. If the test reveals the presence of 0.005 microcurie or more of removable contamination, a report shall be filed with the U.S. Nuclear Regulatory Commission and the source or detector cell shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations. The report shall be filed within five days of the date the leak test result is known with the U.S. Nuclear Regulatory Commission, Region I, ATTN: Chief, Nuclear Materials Safety Branch, 475 Allendale Road, King of Prussia, Pennsylvania 19406. The report shall specify the source or detector cell involved, the test results, and corrective action taken.
- G. The licensee is authorized to collect leak test samples for analysis by licensee. Alternatively, tests for leakage and/or contamination may be performed by persons specifically licensed by the Commission or an Agreement State to perform such services.
17. Detector cells containing a titanium tritide foil or a scandium tritide foil shall only be used in conjunction with a properly operating temperature control mechanism which prevents foil temperatures from exceeding that specified by the manufacturer.
18. The licensee shall conduct a physical inventory every six months, or at other interval approved by NRC, to account for all sealed sources and/or devices received and possessed under the license.
19. The licensee shall not acquire licensed material in a sealed source or in a device that contains a sealed source unless the source or device has been licensed with the Nuclear Regulatory Commission under 10 CFR 32.210 or with an Agreement State.
20. Sealed sources or detector cells containing licensed material shall not be opened or sources removed from source holders by the licensee. ★★★★★
21. The licensee shall maintain and execute the response measure of his Radiological Emergency Contingency Plan submitted to the Commission on February 18, 1997. The licensee shall also maintain procedures as necessary to implement the plan. The licensee shall make no change in his Radiological Emergency Contingency Plan that would decrease the response effectiveness of the plan without prior Commission approval as evidenced by license amendment. The licensee may make changes to his Radiological Emergency Contingency Plan without prior Commission approval if the changes do not decrease the response effectiveness of the plan, and shall maintain records of changes that are made to the plan without prior approval for a period of two years from the date of the changes and shall furnish the Chief, Nuclear Materials Safety Branch, Division of Nuclear Materials Safety, U.S. Nuclear Regulatory Commission, Region I, 475 Allendale Road, King of Prussia, Pennsylvania 19406, a report containing a description of each change within six months after the change is made.

Amendment No. 96

22. The licensee is authorized to hold radioactive material with a physical half-life of less than 120 days for decay-in-storage before disposal in ordinary trash, provided:
- A. Waste to be disposed of in this manner shall be held for decay a minimum of ten half-lives.
 - B. Before disposal as ordinary trash, the waste shall be surveyed at the container surface with the appropriate survey instrument set on its most sensitive scale and with no interposed shielding to determine that its radioactivity cannot be distinguished from background. All radiation labels shall be removed or obliterated.
 - C. A record of each such disposal permitted under this License Condition shall be retained for three years. The record must include the date of disposal, the date on which the byproduct material was placed in storage, the radionuclides disposed, the survey instrument used, the background dose rate, the dose rate measured at the surface of each waste container, and the name of the individual who performed the disposal.
23. The licensee may transport licensed material in accordance with the provisions of 10 CFR 71, "Packaging and Transportation of Radioactive Material."

Dear Mr. Primm:

This refers to your license amendment request. Enclosed with this letter is the amended license.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5093 or 5239, so that we can provide appropriate corrections and answers.

Thank you for your cooperation.

Sincerely,

Original signed by John R. McGrath

RE: **RADIOACTIVE MATERIAL LICENSE NUMBER 29-00139-02**

Dear Dr. Kinneman:

E.R. Squibb & Sons, Inc., a wholly owned subsidiary of Bristol-Myers Squibb Company, wishes to amend its current radioactive license (#29-00139-02) to reflect the following:

- ◆ Replace Mr. Daniel K. Balkunow, the current Radiation Safety Officer, with Michael J. Vala, CHP, effective on or about June 14, 1999.

Mr Vala's résumé, which outlines his experience and qualifications, is enclosed for your review. A check for \$530.00 is also enclosed to cover the cost of this amendment. If you have any questions regarding this matter, please contact Mr. Vala at (732) 519-2987.

Sincerely,

Susan Voigt, Chair of the Radiation Safety Committee
Senior Director, WWMG EH&S

EDUCATION

Masters of Technology Management, May (b)(6)
Stevens Institute of Technology, Hoboken, NJ
Major: Technology Management

Masters of Science, May (b)(6)
Rutgers University, New Brunswick, NJ
Major: Radiation Science

Bachelor of Engineering, May (b)(6)
Stevens Institute of Technology, Hoboken, NJ
Major: Engineering Physics

EXPERIENCE

Health Physics Supervisor
Bristol-Myers Squibb, New Brunswick, NJ

March 1992 - Present

- Responsible for regulatory compliance and radiation safety at a nuclear medicine manufacturing and distribution facility
- Provides operational Health Physics support for largest non-utility radioactive material license in New Jersey
- Review of clinical research protocols involving radiolabeled investigational drugs
- Development of strategic goals and objectives for Health Physics Department
- Provide technical expertise and support for Central New Jersey Radiation Safety Committee
- Represents Environmental Health & Safety on the Facilities & Engineering Quality Customer Focus Team
- Represents Bristol-Myers Squibb on the PhRMA low level radioactive waste sub-committee
- Knowledge of applicable DOT, EPA, FDA, NRC, OSHA and NJ DEP regulations regarding radioactive material use
- Conducting facility compliance audits
- Develops and provides radiation safety training for research, manufacturing, and support personnel
- Personnel monitoring/bioassay techniques and dose calculations
- Approved by the NJ DEP as a Qualified Individual for the performance of radiation surveys for diagnostic x-ray equipment in accordance to NJAC 7:28-15.

EXPERIENCE (continued)

- Projects completed:
 - ◊ Championed the preparation of the application for renewal of the Central New Jersey radioactive material license
 - ◊ Identified and assessed new dosimetry contractor for Bristol-Myers Squibb
 - ◊ Development of a Decommissioning Funding Plan for five licensed sites including a Radiopharmaceutical manufacturing facility and R&D areas for submission to the NRC
 - ◊ Developed radioactive waste labeling, sorting and packaging program for PRI personnel in preparation of interim waste storage period.

Health Physicist
Teledyne Isotopes, Westwood, NJ

March 1987 - March 1992

- Managed radioactive waste brokerage service
 - ◊ Regulatory compliance
 - ◊ Non-routine waste disposal
 - ◊ Facility decontamination and disposal
 - ◊ Supervised environmental and facility characterizations, remediations, and decontaminations
 - ◊ Radiation safety audits and evaluations for consulting clients

CERTIFICATION

American Board of Health Physics -
Comprehensive Certification in Health Physics, November 1993, Re-certified 1997

PROFESSIONAL SOCIETIES

- New Jersey Health Physics Society (President 1995)
- National Health Physics Society
- American Academy of Health Physics
