Public

WISCONSIN PUBLIC SERVICE CORPORATION

P.O. Box 1200, Green Bay, Wisconsin 54305

The referenced letter requested the following information:

- 1. Name of facility: Kewaunee Nuclear Power Plant
- 2. Scheduled date for next refueling shutdown: 2/1/76 (1st Refuel)
- 3. Scheduled date for restart following refueling: 4/1/76
- 4. Will refueling or resumption of operation thereafter require a technical specification change or other license amendment?

The design parameters of the reload core are within the envelope of the originally licensed core. Plant modifications which require licensing action are not anticipated at this time. The reload fuel design and core configuration will be reviewed by the Nuclear Safety Review and Audit Committee, NSRAC, in the fall meeting which is scheduled for the month of November. A technical review by our Corporate Nuclear Engineering Staff is scheduled prior to the NSRAC review.

5. Scheduled date(s) for submitting proposed licensing action and supporting information.

On or before January 1, 1976, Wisconsin Public Service Corporation intends to submit the required information.

۰,

August 5, 1975

6. Important licensing considerations associated with refueling, e.g., new or different fuel design or supplier, unreviewed design or performance analysis methods, significant changes in fuel design, new operating procedures.

New licensing considerations such as different fuel design, supplier, operating methods, etc., are <u>not</u> associated with this upcoming refueling.

Very truly yours,

E. W. James Senior Vice President Power Supply & Engineering

EWJ:sna
