In response to your inquiry related to the amendment request for Des Peres Hospital, control number 574912:

1. Remove Item 6D, by-product material permitted by 10CFR31.11, in vitro studies. These procedures are no longer performed at the facility and authorization may be removed. Procedures performed under this authorized use were discontinued prior to June 1, 2006.
2. The facility only performs radiopharmaceutical therapy procedures using activity  $\leq 33\text{mCi}$  of I-131. No high dose radiopharmaceutical therapy procedures, or procedures requiring hospitalization, are performed. This should allow Dr. Cizek to act as Radiation Safety Officer.

If you require additional information please contact our office. Thank you for your attention on this matter.

Sincerely,

  
 Des Peres Hospital representative signature
