Director of Nuclear Reactor Regulation  
 Attention: Mr. S. A. Varga, Chief  
 Operating Reactors Branch No. 1  
 Division of Licensing  
 U.S. Nuclear Regulatory Commission  
 Washington, D.C. 20555

Dear Mr. Varga:

Docket 50-305  
 Operating License DPR-43  
 Kewaunee Nuclear Power Plant  
 Environmental Qualification of Electrical Equipment Important to Safety:  
 Justification for Continued Operation

---

Reference: 1) Letter to C. W. Giesler of WPSC from S. A. Varga of the NRC  
 dated February 2, 1983

Confirming the conversation we had with our Project Manager, Mr. Grotenhuis, on March 3, 1983, the thirty (30) day response (Justification for Continued Operation) required by reference 1 will be superseded by a revised transmittal letter that we have not received. This was necessitated by inaccuracies contained in the original letter and the fact that the final rule (10CFR50.49) was not taken into account. It is our understanding that the revised letter will no longer require a ninety (90) day response (Schedule of Proposed Corrective Actions) although it will require Justification for Continued Operation thirty (30) days from receipt. In addition, it is our intention to meet all of the reporting requirements of the final rule.

Very truly yours,

C. W. Giesler  
 Vice President - Nuclear Power
