Docket 50-305
Operating License DPR-43
Kewaunee Nuclear Power Plant
Kewaunee Steam Generator Slewing Report

- References:
- 1) Letter from D. C. Hintz (WPSC) to US NRC Document Control Desk dated November 30, 1987
 - 2) Letter from J. G. Giitter (US NRC) to Wisconsin Public Service (WPSC) dated April 8, 1988
 - 3) Letter from J. G. Giitter (US NRC) to D. C. Hintz (WPSC) dated April 7, 1988

Reference 1 transmitted, in part, WCAP 11643, Kewaunee Steam Generator Slewing Report, November, 1987 (Proprietary), and WCAP 11644, Kewaunee Steam Generator Slewing Report, November, 1987 (Non-Proprietary).

Reference 2 summarized the March 31, 1988 meeting of Wisconsin Public Service, Westinghouse, and US NRC staff to discuss proposed changes to the steam generator tube sleeve installation process variables described in WCAP 11643.

Reference 3 recapped the March 31, 1988 meeting and concluded with the NRC staff finding that the described process variable changes did not affect previous NRC approval, and cited agreement to the operation of Kewaunee with the modified slewing process.

As a result of successful long-term qualification testing of sleeves installed using the modified process variables, WCAP 11643 and WCAP 11644 have been updated to incorporate these modified process variables. WCAP 11643 Rev. 1 (Proprietary) and WCAP 11644 Rev. 1 (Non-Proprietary) are included as Attachment 1 and Attachment 2, respectively.
