Gentlemen:

Docket 50-305
Operating License DPR-43
Kewaunee Nuclear Power Plant
Comments on the Storage of Spent Fuel at the Sites of Power Reactors

Reference: Federal Register Volume 54 Number 86 Dated May 5, 1989,
Pages 19379 through 19387

We have reviewed the above referenced Federal Register Notice and find that we are in general agreement with the changes being made concerning the storage of spent fuel at the sites of power reactors. Specifically, the provision to allow for the storage of spent fuel at the sites of power reactors without, to the maximum extent practicable, the need for additional site-specific approval is appropriate regulation. We find that adequate provisions are included in the rule to ensure the public's health and safety is maintained.

Sincerely,

A handwritten signature in cursive script, appearing to read "C. R. Steinhardt".

C. R. Steinhardt
