U.S Nuclear Regulatory Commission Attn: Document Control Desk Washington, D.C. 20555

Gentlemen:

Docket 50-305 Operating License DPR-43 Kewaunee Nuclear Power Plant Summary of Bulletin 88-08 Supplement 3 Inspections

Reference 1) Letter from Mr. C. R. Steinhardt (WPSC) to Document Control Desk dated August 31, 1989, Response to Bulletin 88-08 Supplement 3

In response to Bulletin 88-08 Supplement 3 (reference 1) Wisconsin Public Service Corporation (WPSC) committed to inspect 3 welds on the Kewaunee Nuclear Power Plant's (KNPP) Residual Heat Removal (RHR) suction lines. The inspections were scheduled for and completed during the 1990 refueling outage.

The KNPP refueling outage ended on April 17, 1990. In accordance with the requirements of Bulletin 88-08 this letter is being submitted to report the results of these inspections.

The three affected welds (2 on the A loop, 1 on the B loop) were ultrasonically inspected using 0°, 45° and 60° beam transducers. These examinations found no recordable indications. All three welds were also subjected \mathfrak{t} 0 a liquid penetrant examination. No recordable indications were noted during the surface examinations. As no recordable indications were found as a result of these examinations, the inspection frequency will remain as stated in reference 1.

If you have any further questions regarding this response please contact me or a member of my staff.

Sincerely.

Manager - Nuclear Power
