Edson G. Case, Acting Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Case:

Thank you for your letter dated November 3, 1977 in which you responded to several questions I raised regarding compaction of spent nuclear fuel at Point Beach, Kewaunee and LaCrosse nuclear power plants.

Have applications for increasing the spent fuel storage capabilities of Point Beach and Kewaunee plants been submitted to the NRC subsequent to your November 3 letter? If so, when will hearings be held in these areas regarding these proposed compactions?

Would you please forward a list of nuclear plants throughout the country which have been granted amendments to their licenses to compact spent nuclear fuel, how many assemblies these plants were originally licensed to store at the plant sites, and the number of assemblies approved for storage with license amendments.

We would also appreciate receiving a copy of the draft environmental impact statement on spent fuel storage which was supposed to have been issued in draft form in Fall of 1977.

Thank you for your help.

Sincerely,

Mrs. Wend Schaefer
