K. Goller, Assistant Director for Operating Reactors, DOR

KEWAUNEE - UPGRADE OF TECHNICAL SPECIFICATIONS RE FILTER SYSTEMS
TAR NO. 3604, ORB 1-222, OT 76-42

PLANT NAME: Kewaunee
DOCKET NUMBER: 50-305
RESPONSIBLE BRANCH: ORB-1
PROJECT CONTACT: Don Neighbors
REQUEST RECEIVED BY EEB: March 8, 1976
REQUEST COMPLETION DATE: April 20, 1976
REVIEW STATUS: EEB Continuing

The Environmental Evaluation Branch has reviewed the February 4, 1976 letter from Wisconsin Public Service Corporation (WPSC). As discussed with Don Neighbors, a meeting is being planned between NRC and WPSC to discuss the specific problems of applying ANSI N510-1975 to the Kewaunee Plant. Since the processing of the filter system technical specifications is dependent on this meeting, it is suggested that the specific problems at Kewaunee concerning the Shield Building Ventilation System (SBV) and the Auxiliary Building Special Ventilation System (ASV) also be discussed at this time. EEB is prepared to meet with WPSC to further discuss these specific problems. After such meeting, EEB will provide a written response regarding the SBV and ASV.

The EEB contacts on this project are J. Donohew and J. S. Bland.
