Docket No. 50-305

R. A. Purple, Chief, Operating Reactors Branch No. 1, DOR

RESPONSE FROM WISCONSIN PUBLIC SERVICE CORPORATION WITH RESPECT TO APPENDIX I TO 10 CFR PART 50 FOR KEWAUNEE NUCLEAR POWER PLANT

We have reviewed the response from Wisconsin Public Service Corporation for the Kewaunee Nuclear Power Plant with respect to Appendix I to 10 CFR Part 50 and we have the following comments.

We find the response unacceptable. Section V.B.1 of Appendix I requires, in part, that all licensees whose plants were docketed prior to January 2, 1971 file with the Commission "such information as is necessary to evaluate the means employed for keeping levels of radioactivity in effluents to unrestricted areas as low as practicable including all such information as is required by 50.34a(b) and (c) not already contained in his application." In our letter of February 19, 1976 we provided guidance and requested additional information, in the form of Enclosures 1 and 2, that we will need to determine conformance with Appendix I. In this regard the licensee should specify the measures he intends to adopt and indicate what information will be furnished by June 4, 1976 in conformance with Section V.B of Appendix I. If the licensee cannot furnish all of the requested information by this date then he should provide us a schedule indicating when the rest of the information will be available.
