

January 12, 1984

Docket No. 50-305
LICENSEE: Wisconsin Public Service Corp. (WPSC)
FACILITY: Kewaunee Nuclear Power Plant
SUBJECT: SUMMARY OF MEETING HELD ON JANUARY 5, 1984 WITH WPSC TO
DISCUSS SHIFT MANNING

The subject meeting was held in Bethesda, Maryland between NRC and WPSC representatives. A list of attendees is attached.

The purpose of the meeting was to discuss the WPSC request for extension of the date to comply with the shift manning rule [10 CFR 50.54(m)]. WPSC's letter dated September 30, 1983, requested an extension until July 1, 1984.

The justification for the extension was based on the fact that some of the senior reactor operator (3) exams would not be completed until April 1984 and some time was needed for additional training and evaluation. Following a review of the Kewaunee staffing plan, WPSC concluded at the meeting that compliance could be met by the startup from the next refueling which is scheduled to take place from March 16 to May 12, 1984.

WPSC is going to commit by letter to be in compliance by startup from refueling and will not require an extension beyond that time. The NRC stated that an extension until that time would be acceptable.
