ATTN: Radioisotope Committee
1780 AF Pentagon
Washington, DC 20330-1780

SUBJECT: LICENSE AMENDMENT

Please find enclosed Amendment Number 22 to NRC License Number 42-23539-01AF **authorizing the new mailing address documented by your letter dated April 27, 2011. Although your mailing address has changed, your office location is still the same on Wilson Boulevard in Arlington, Virginia.** An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14). You should review the enclosed document carefully and be sure that you understand all conditions. If there are any questions, please contact me at (817) 860-8132.

NRC expects licensees to conduct their programs with meticulous attention to detail and a high standard of compliance. Because of the serious consequences to employees and the public that can result from failure to comply with NRC requirements, you must conduct your radiation safety program according to the conditions of your NRC license, representations made in your license application, and NRC regulations. NRC will periodically inspect your radiation safety program in accordance with Manual Chapter 2810, "Master Material License Inspection Program." Failure to conduct your program according to NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action against you. This could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available at the following internet address: <http://www.nrc.gov/reading-rm/doc-collections/enforcement/>.

NRC no longer publishes the NRC Rules and Regulations loose leaf supplements. However, an electronic version of the NRC's regulations is available on the NRC Web site at www.nrc.gov. Additional information regarding use of radioactive materials may be obtained on the NRC Web site at <http://www.nrc.gov/materials/miau/mat-toolkits.html>. This site also provides the link to the toolbox for updated information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

/RA/

Jacqueline D. Cook, Senior Health Physicist
Nuclear Materials Safety Branch B
