April 20, 2011

Mr. Larry Meyer  
Site Vice President  
NextEra Energy Point Beach, LLC  
6610 Nuclear Road  
Two Rivers, WI 54241

**SUBJECT: OPERATOR LICENSING EXAMINATION APPROVAL**

Dear Mr. Meyer:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing examinations at the Point Beach Nuclear Plant.

The U. S. Nuclear Regulatory Commission (NRC) has completed its review of the operator license applications in connection with this examination and separately provided a list of approved applicants to Mr. Douglas Lauterbur, Training Manager. Note that any examination waivers and application denials have been addressed in separate correspondence.

The NRC will administer the written examinations and operating tests in accordance with Revision 9, Supplement 1, of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors," during the weeks of April 25 and May 2, 2011. This examination has undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review, I have concluded that the examination meets the guidelines of NUREG-1021 for content, operational, and discrimination validity. If you determine that this examination is not appropriate for licensing operators at your facility, please contact me at 630-829-9707.

Please contact your Chief Examiner, Mr. Dell R. McNeil, at 630-829-9737, if you have any questions or identify any errors or changes in the license level (RO or SRO) or type of examination (partial or complete written examination and/or operating test) specified for each applicant.

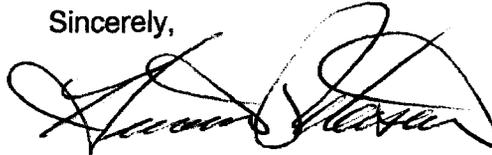

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records System (PARS) component of NRC's Agencywide Documents

**SUBJECT: POINT BEACH NUCLEAR PLANT  
CONFIRMATION OF INITIAL LICENSE EXAMINATION**

Dear Mr. Meyer:

In conversation on January 20, 2011, between Mr. R. Amundson and Mr. D. McNeil, arrangements were made for the administration of licensing examinations at the Point Beach Nuclear Power Plant during the weeks of April 25 and of May 2, 2011. In addition, the NRC will make an examination validation visit to your facility the week of April 4, 2011.

As agreed during the telephone conversation, the staff of the U. S. Nuclear Regulatory Commission (NRC) will prepare the examinations based on the guidelines in Revision 9, Supplement 1, of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." Your staff will be given the opportunity to review the examinations during the week of April 4, 2011.

To meet the above schedule, it was necessary for your staff to furnish the reference materials identified in Attachment 3 to ES-201 by December 15, 2010. Your staff has provided the required reference material.

In order to conduct the requested written examinations and operating tests, it will be necessary for your staff to provide adequate space and accommodations in accordance with ES-402, and to make the simulation facility available on the dates noted above. In accordance with ES-302, your staff should retain the original simulator performance data (e.g., system pressures, temperatures, and levels) generated during the dynamic operating tests until the examination results are final.

Appendix E to NUREG-1021 contains a number of NRC policies and guidelines that will be in effect while the written examinations and operating tests are being administered.

To permit timely NRC review and evaluation, your staff should submit preliminary reactor operator and senior reactor operator license applications (Office of Management and Budget (OMB) approval number 3150-0090), medical certifications (OMB approval number 3150-0024), and waiver requests (if any) (OMB approval number 3150-0090) at least 30 days before the first examination date. If the applications are not received at least 30 days before the examination date, a postponement may be necessary. Signed applications certifying that all training has been completed should be submitted at least 14 days before the first examination date.

This letter contains information collections that are subject to the *Paperwork Reduction Act of 1995* (44 U.S.C. 3501 et seq.). These information collections were approved by the Office of Management and Budget, approval number 3150-0018. The public reporting burden for this collection is estimated to average 50 hours per response, including the time for reviewing instructions, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of these information collections, including suggestions for reducing the burden, to the Records and FOIA/Privacy Services Branch (T-5 F52), U. S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by Internet electronic mail to [INFOCOLLECTS@NRC.GOV](mailto:INFOCOLLECTS@NRC.GOV); and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0018), Office of Management and Budget, Washington, DC 20503.

The NRC may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records System (PARS) component of NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Thank you for your cooperation in this matter. Mr. Amundson has been advised of the policies and guidelines referenced in this letter. If you have any questions regarding the NRC's examination procedures and guidelines, please contact Mr. D. McNeil at 630-829-9737, or me at 630-829-9707.

Sincerely,

/RA/

**SUBJECT: CONFIRMATION OF INITIAL OPERATOR LICENSE EXAMINATIONS:  
POINT BEACH NUCLEAR PLANT**

Dear Mr. Meyer:

In a letter dated August 17, 2009, (NRC 2009-0083), your staff responded to the NRC's Regulatory Issue Summary (RIS) 2009-11, and requested we schedule initial operator license examinations in April 2011, May 2012, and in May 2013, at the Point Beach Nuclear Plant. We have scheduled the examination requested to be conducted in April 2011 to begin the week of April 26, 2011. For the examination requested in May 2012, we have re-scheduled the examination you previously requested for February 2012 to an examination beginning the week of May 7, 2012. For the examination requested in May 2013, we have schedule the examination to begin the week of May 13, 2013. On-site validation of each of these examinations will occur approximately three weeks before the start of the examination. In the unlikely event that we are unable to support the examination during the scheduled weeks, we will inform you immediately upon discovery of such conditions and make arrangements to administer the examination at a mutually acceptable date.

We have discovered it will be necessary for the NRC examiners to develop the written and operating test to be administered during the April 2011 initial license examination. The NRC chief examiner assigned to that examination has already contacted your initial license operator training program supervisor and explained our need to develop the examination. We understand your staff will develop the examinations scheduled during 2012 and 2013. Each of the scheduled examinations was scheduled for two weeks because your letter indicated each examination has more than nine applicants taking the examinations. Please inform us if the number of applicants declines below ten as this will impact the examination schedule. Please inform us at your earliest opportunity if you discover you need to change the scheduled dates for the examinations.

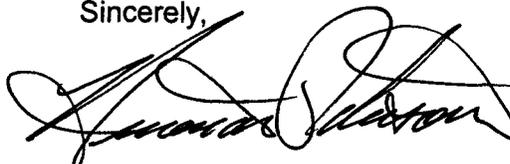

A supplementary letter will be sent to the Point Beach Nuclear Plant's Training Department approximately 120 days prior to the initial examination informing the training manager of the chief examiner's name. The letter will also outline examination security expectations, list the materials required by the NRC to conduct the examination, reconfirm the examination dates, and reconfirm the number of candidates you have in the training program. If you have any questions concerning this information, please contact Mr. Dell McNeil of my staff at 630-829-9737.

**SUBJECT: CONFIRMATION OF INITIAL/REQUALIFICATION OPERATOR LICENSE  
EXAMINATIONS: POINT BEACH NUCLEAR PLANT**

Dear Mr. Meyer:

In a letter dated July 28, 2008 (NRC 2008-0055), your staff requested we schedule initial operator license examinations in May 2009 and in February 2012 at the Point Beach Nuclear Plant. We have scheduled the examination requested to be conducted in May 2009 to begin the week of May 4, 2009. We have scheduled the examination requested for February 2012 to begin the week of February 13, 2012. Your staff also requested an examination be scheduled during February 2011. This request is actually a change request to move a previously scheduled examination from May 2011 to February 2011. Unfortunately, we are unable to accommodate the examination requested in February 2011 due to a heavy examination load. After discussing available examination weeks, Mr. M. Durbin of your staff notified Mr. D. McNeil, NRC Senior Operations Engineer, that the proposed examination start week of March 21, 2011, would be acceptable examination start week. Therefore, an examination has been scheduled for the Point Beach Nuclear Plant beginning the week of March 21, 2011. On-site validation of each of these examinations will occur approximately three weeks before the start of the examination. In the unlikely event that we are unable to support the examination during the scheduled weeks, we will inform you immediately upon discovery of such conditions and make arrangements to administer the examination at a mutually acceptable date.

We understand that your staff will develop the examination unless we determine it is necessary for the NRC to write the examination. Each of the scheduled examinations was scheduled for two weeks because your letter indicated each examination has more than nine applicants taking the examinations. Please inform us if the number of candidates for an examination declines below ten as this will impact the examination schedule. Please inform us at your earliest opportunity if you discover you need to change the scheduled dates for the examinations.

A supplementary letter will be sent to the Point Beach Nuclear Plant's Training Department approximately 120 days prior to the initial examination informing the training manager of the chief examiner's name. The letter will also outline examination security expectations, list the materials required by the NRC to conduct the examination, reconfirm the examination dates, and reconfirm the number of candidates you have in the training program.

We have scheduled a Licensed Operator Qualification Training Program Inspection (IP 71111.11) for the week of August 31, 2009. Please inform us at your earliest opportunity if you discover this week is outside of your normally scheduled requalification training program's annual examinations. If you have any questions concerning this information, please contact Mr. Dell McNeil of my staff at 630-829-9737.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the Electronic Reading Room page of the NRC's public Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Response to Regulatory Information Summary 2010-08,  
"Preparation and Scheduling of Operator Licensing Examinations"

On June 28, 2010, the NRC issued Regulatory Issue Summary (RIS) 2010-08. RIS 2010-08 requests that each licensee provide an update of operator licensing examination information for calendar years 2011 through 2014.

The enclosure to this letter provides the NextEra Energy Point Beach, LLC, response for the Point Beach Nuclear Plant, Units 1 and 2.

During recent routine communications with representatives of the Region III Operator Licensing Branch regarding examination scheduling, it was requested that NextEra formalize the proposed changes. The changes are:

1. Release the May 2012 examination date  
Site Validation week of November 12, 2012  
Examinations during the weeks of December 3 and 10, 2012
2. Release the May 2013 examination date  
Site Validation week of October 28, 2013  
Examine the weeks of November 18 and 25, 2013

If there are questions associated with the content of the enclosures, please contact Mr. Douglas Lauterbur, Point Beach Nuclear Plant Training Manager, at 920/755-7791.

Very truly yours,

NextEra Energy Point Beach, LLC

"Preparation and Scheduling of Operator Licensing Examinations"

On July 16, 2009, the NRC issued Regulatory Issue Summary (RIS) 2009-11. RIS 2009-11 requests that each licensee provide an update of operator licensing examination information for calendar years 2010 through 2013.

The enclosure to this letter provides the NextEra Energy Point Beach, LLC, response for the Point Beach Nuclear Plant, Units 1 and 2.

There are no new regulatory commitments or revisions to existing commitments contained in the enclosure of this letter.

If there are questions associated with the content of the enclosures, please contact Mr. Douglas Lautenbur, Point Beach Nuclear Plant Training Manager, at 920/755-7791.

Very truly yours,

NextEra Energy Point Beach, LLC

**OPERATOR LICENSING  
EXAMINATION DATA**

Estimated burden per response to comply with this voluntary information collection request: 1 hour. This information collection is used to plan budgets and resources for operator examinations. Send comments regarding burden estimate to the Records and FOIA/Privacy Services Branch (T-5 F53), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by internet e-mail to [infocollect@nrc.gov](mailto:infocollect@nrc.gov), and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0131), Office of Management and Budget, Washington, DC 20503. If a means used to impose an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.
